

ContractIQ AI

Autonomous Contract Intelligence Platform

Contracts should manage themselves.

Platform overview — pre-sign-in tabs content

1. Overview

ContractIQ AI transforms contracts into intelligent business assets — reading, understanding obligations, detecting risks, tracking renewals, and driving business actions automatically.

Key capabilities

- Autonomous contract analysis with health scores
- AI agents for review, compliance, renewal, and negotiation
- Natural language contract Q&A
- Portfolio-wide risk visibility and renewal tracking

2. The Problem

Thousands of contracts. Zero visibility.

Large enterprises manage thousands of contracts — yet most live scattered across emails, drives, and folders, untracked and silently creating risk.

Challenges

- Contracts stored across emails, drives, and folders
- Renewal dates are missed
- Legal review takes days or weeks
- Compliance risks detected too late
- Teams spend hours searching documents
- Contract obligations manually tracked

Business outcomes at risk

- Revenue leakage
- Legal exposure
- Compliance failures
- Operational inefficiency

3. The Solution

From storage to operating system

Most CLM platforms are contract storage systems. ContractIQ becomes a Contract Operating System — where contracts actively drive business actions.

What ContractIQ does

- Reads contracts automatically
- Understands obligations
- Detects risks
- Tracks renewals & sends reminders
- Recommends actions
- Answers contract questions using AI

User journey

1. Upload Contract
2. AI Reads Contract
3. Extracts Metadata
4. Identifies Risks
5. Creates Obligations
6. Tracks Deadlines
7. Generates Insights
8. Alerts Stakeholders

4. AI Agents

Specialized AI agents work together to review, comply, renew, and negotiate — autonomously.

Review Agent

Checks:

- Missing clauses
- High-risk clauses
- Unusual language

Output:

Recommendations

Compliance Agent

Checks:

- GDPR
- HIPAA
- Internal Policies

Output:

Compliance report

Renewal Agent

Checks:

- Renewal dates
- Notice periods

Output:

Reminders, tasks & renewal drafts

Negotiation Agent**Checks:**

- Alternative clauses
- Risk reductions
- Pricing

Output:

Negotiation recommendations

5. Why It Matters to Customers

Built for business outcomes, not IT architecture

Customers don't buy contract software — they buy fewer missed renewals, faster legal cycles, and lower compliance risk. ContractIQ AI connects every feature to a measurable business result.

Protect revenue

Never miss a renewal window or leave money on the table. AI tracks expiry dates and drafts renewals before deadlines pass.

Reduce legal risk

Critical clauses and unlimited liability terms are flagged instantly — not discovered during a dispute.

Stay compliant

GDPR, HIPAA, and internal policy gaps are detected at upload, not during an audit.

Save legal team time

First-pass review, obligation extraction, and contract search cut review cycles from days to minutes.

One source of truth

Stop hunting through email and shared drives. Every contract, obligation, and deadline lives in one intelligent hub.

Act before problems escalate

Proactive alerts and Contract Health Scores turn reactive firefighting into planned business actions.

6. Business Impact

Measurable outcomes

70% — Faster reviews
60% — Fewer missed renewals
80% — Faster contract search
Reduced — Legal & compliance risk

Current Process

5 days: Manual review, email chains, missed deadlines

With ContractIQ AI

5 minutes: AI detects expiry, drafts renewal, human approves

7. Vision

Autonomous Contract Operations

From Contract Management to Autonomous Contract Operations — where contracts expire, AI detects it, drafts the renewal, schedules stakeholder review, and negotiates approved clauses with just 5 minutes of human approval.
